GERMAN SYNDICATE HAS ES-TABLISHED ITS SALES AGENCY.

Break With Schmidtmann and the International Agricultural Corporation Has Disrupted a Monopoly Which Had Been Making Prices for 20 Years.

The Herren Direktors Schüddekopf and Forthmann, sent over here by the German potash syndicate with letters of marque and reprisal issued against Waldemar Schmidtmann and the International Agricultural Corporation, of which he is president, have returned to Germany after having given authorization for incorporating the syndicate's selling agency on this side. The selling agency was incorporated in this State under the name of the German Kali Works with a nominal capital of \$100,000. It will represent about forty potash mines, the aggregate capi-

alization of which is about \$250,000,000. Schmidtmann and the International Agricultural Corporation have lost popularity with the syndicate because they igned up huge five year contracts with than the official scale after the old syndithan the official scale after the old syndi-cate agreement had expired and before a new one had been drawn up. These contracts they refused to give up and as a result the Einigkeit and Ascheraleben mines, which Schmidtmann owns, and the Sollstedt mine, which he had sold to the newly organized International Agri-cultural Corporation, were barred out of the new syndicate. This disruption broke a potash monopoly which had been making prices for the world for twenty years.

years.

The selling agency will set to work energetically to make business for the Germans. Already 50,000 marks has been spent in consolidating the American selling organization, which has branches selling organization, which has branches in Atlanta and in Chicago. It will depend largely for getting business upon offering to independent consumers syndicate privileges, which hitherto have been granted only the very biggest buyers, such as the Virginia-Carolina Chemical or the American Agricultural Chemical Company. Price outting is not contemplated. The syndicate will try to boost business by a campaign of education business by a campaign of education designed to show the advantages of a pure as against a mixed fertilizer, and to this newly incorporated company. The other officers are: Vice-president, H. Duhrssen; secretary, H. A. Huston; treasurer, Paul Dinkenspiel.
